

The CHAIN-TAPE COLLECTIVE was originally started by Michael Klobuchar in 1998 as a chain tape group; that is, as a group whose members recorded music by mailing a master tape throughout the United States and Europe.

Since then, we've started to do more than one project at a time, and publishing them to the web via the CT-Collective.com website.

As part of our effort to streamline what was otherwise a rather cumbersome process, we have organized a main mailing list through which all projects are now coordinated. As projects get underway, they get their own mailing list

The description for this project was to make a composition that reflects our natural environment or wilderness – things that have not been substantially altered by human intervention.

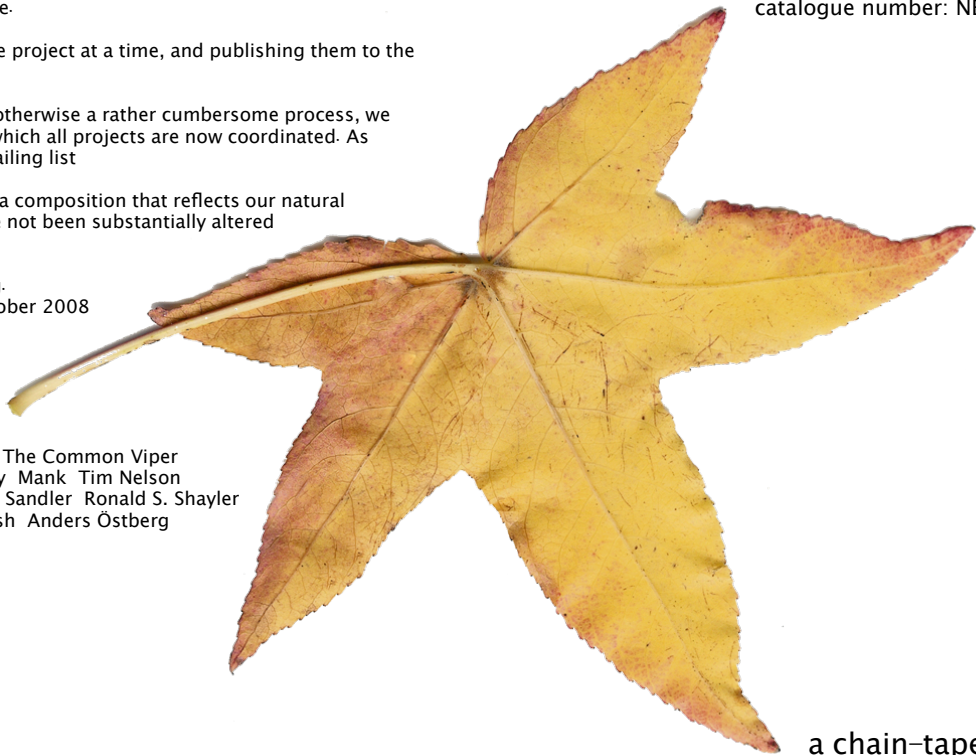

Coordination and artwork by Anders Östberg.  
Project created in May 2008, finished in October 2008
